

Areas we serve

FOSSIL FUEL PLANTS

Coal fired • Gas fired • Oil fired

ŠKODA PRAHA acts as EPC Contractor and EPC Manager (EPCM) as well as a provider of engineering, owner's engineering and consultancy services. ŠKODA PRAHA provides tailor made engineering solutions using the state of art technologies. ŠKODA PRAHA also supports international clients by export financing.

NUCLEAR POWER PLANTS

Conventional Island of nuclear power plants • Balance of plant

Specific know-how of ŠKODA PRAHA includes consultancy and Owner's Engineering (OE) services for nuclear power plants. As EPC contractor of nuclear power plant projects in Czech and Slovak Republic, we have maintained our competency for supplies of conventional island and balance of plant. Our activities include upgrade of power plant systems, increase of power output and implementation of most recent safety standards.

RENEWABLES AND WASTE TO ENERGY

**Biomass • Biogas • Waste to Energy**

In cooperation with recognized global manufacturers, ŠKODA PRAHA offers EPC and engineering services of biomass fired and biogas stations as well as municipal waste incineration plants.
