

## Commissioning services

Contract for turnkey commissioning services of coal fired power plant with output 330MW in Turecku. Our client, Odas Enerji, is performing a highly demanding execution of relocation of a shut down power plant from Austria to Canakkale region, where we already assist as an owner's engineer. Following these services we were asked by the client to provide an offer for commissioning, incl. preparation of relevant documentations.

After several rounds of negotiations, the contract was signed on 31.5.2017 with an immediate start of backoffice activities and planned mobilization in September or October this year. Total duration of main site activities is estimated to last 10 months.
