

Owner's Engineer

ŠKODA PRAHA provides team of experts from different engineering specialties that serves as an experienced and skilled advisor of the client. It plays a supporting role by filling gaps and supplementing owner's resources during development, design and construction phases of the project to confirm that the work is done well and within contractual obligations and legal standards. ŠKODA PRAHA acts in favor of the client, supervising and reviewing EPC contractor activities; its main goal is to assist the client to reach its objectives.

- Technical and commercial support of the client
- Supervision of EPC contractor during project execution
- Time schedule supervision
- Quality control
- Conceptual design
- Tender management
- Design review
- Procurement monitoring
- Construction supervision
- Commissioning assistance
